Advanced Underground PVC Pipe Detection
Patented Technology
Advanced PVC & PE Pipe Detection
FCC, IC & EU/CE Approved
INTRODUCING THE
TECHNOLOGICALLY ADVANCED
AML™ SERIES

REFINED. PROVEN. TRUSTED.

The All-New AML PRO™ & AML+™ Series “All Material Locators” are scientific instruments that utilize modulated, ultra-high radio frequencies to find differences in subsurface densities. This offers the best method for locating PVC & PE pipes and nearly any other subsurface object that has an edge. Utilizing technology that was developed for lunar exploration, the AML will locate subsurface materials indiscriminately - plastic, metal, wood, cable or pipe. Unlike the deficiencies of GPR (Ground Penetrating Radar), the AML will work in clay, wet soil, snow or even standing water. Redesigned specifically for the utility, water, gas and cable industries, the AML allows professionals to locate objects faster, while maximizing job efficiency.

INCLUDES ALL AML+ FEATURES AND:
> Lightweight Construction (2.5 lbs.)
> Durable ABS Housing
> Backlit Display
> GPS Plotting & Tracking
> 32 Sensitivity Settings
> Digital Leveling Meter
> Digital Targeting Indicator
> Noise Isolating Headphones
> Customizable User Preferences

UNDERSTANDING HOW ULTRA-HIGH FREQUENCY (UHF) RADIO WAVES WORK

The key to how the AML works is to understand how its ground-penetrating UHF radio waves detect PVC pipes, PE pipes and other objects.

Holding the AML’s handle parallel to the ground, scan the area of the undetectable buried object until one or both of the target indicators activate. While the left or right target indicator is activated, rotate the AML until both LED target indicators light simultaneously, triggering the AML’s tone and laser marker. This alert indicates that the pipe or object has been detected and that the AML is now parallel with the underground object.

With the AML parallel with the pipe or underground object, you can now scan the entire length of the object’s edge. As an alternative, utilize the “W” method of scanning by sweeping the area in a back-and-forth “W” motion, marking the object’s location and run direction as it is tracked.

Both the AML Pro & AML+ are available in 3 optional housing colors.

Yellow  Black  Carbon Fiber

PROUDLY MADE IN THE USA
EASY BATTERY ACCESS
Powered by a convenient 9-volt battery system, the AML features long, powerful on-the-job usage between power source changes.

ERGONOMIC HANDLE
An ergonomic handle provides a firm grip in any weather condition.

HEADPHONE JACK
A convenient headphone jack allows the user to listen to audio signals with premium noise isolating headphones (included).

LIGHTWEIGHT, DURABLE CONSTRUCTION
The AML is constructed from lightweight, shock-resistant materials that make it easy to use and handle throughout the work day.

MULTI-BUTTON PANEL
Durable tactile membrane buttons control the unit’s power source and menu options. Once the unit is on, the user can navigate its scrolling menu to adjust sensitivity and operational settings displayed on the LCD screen.

ULTRA-HIGH FREQUENCY (UHF) RADIO WAVE TRANSMITTER
Using advanced circuit board technology, powerful 2.45 GHz ground penetrating, UHF radio waves locate PVC pipes easily. Man-made objects with a straight edge create a change in density or permeability from surrounding materials, which causes refracted radio waves to be detected by the AML.

DIGITAL BACKLIT DISPLAY
A high contrast, backlit digital display provides superior visibility in both direct sunlight and dark environments.

LASER TARGET INDICATOR
An easy-to-see laser indicator highlights the located object’s position on the ground when it has been detected.

ULTRA-HIGH FREQUENCY (UHF) RADIO WAVE RECEIVERS
Highly sensitive dual left and right receivers intercept frequency refractions set off by the edges of buried PVC pipes. When the unit is positioned parallel to a pipe, both the left and right target indicators are activated, allowing the user to identify the object’s run direction.

DURABLE CARRYING CASE
The AML is a highly technical scientific instrument. To protect it, an impact resistant and water proof carrying case with a shock-absorbent foam housing protects your AML while in transit or on the job site.

RECHARGEABLE LITHIUM BATTERY KIT
Use it as an auxiliary long lasting power source.

RIGHT SIDE & LEFT SIDE TARGET INDICATORS
The LED indicators provide a visual signal when an undetectable object has been located. Individual left and right LED lights, as well as the digital target indicators provide the user with an accurate reading of the subsurface objects being scanned, allowing them to be marked and tracked efficiently.

DIGITAL TARGET INDICATOR
Increase the accuracy and speed of finding sub-surface objects. A digital left and right meter-hones the operator to the exact location of an underground object so it can be marked and tracked efficiently.

SENSITIVITY LEVEL
Designed to provide the highest degree of accuracy available, the AML Pro has 32 individual sensitivity settings that allows the user to zero our unwanted feedback and focus directly on the object itself.

BUILT-IN USB MINI PORT
Powerful USB flexibility allows users to export GPS coordinates, import the latest firmware updates and connect to the auxiliary lithium battery source.

ADVANCED GPS MAPPING
Map your coordinates on the job site with advanced GPS tracking and export to other devices via data transfer through the USB mini port.

EASY BATTERY ACCESS
Powered by a convenient 9-volt battery system, the AML features long, powerful on-the-job usage between power source changes.

ERGONOMIC HANDLE
An ergonomic handle provides a firm grip in any weather condition.

RIGHT SIDE & LEFT SIDE TARGET INDICATORS
Easy to read left and right LED target indicators identify when a PVC pipe has been located, and when the pipe is parallel with the AML. Audio and laser target indicators work in union with the right and left LEDs to alert the operator of a pipe’s presence, and to place its location.

POWER & MULTI-POSITION SENSITIVITY SWITCH
This switch controls the unit’s power source and sensitivity. Once the unit is turned on, the operator can choose from 9 different levels of sensitivity to match the needs of each job’s conditions.

LED POWER INDICATOR
The power indicator emits a bright green LED light when the unit is on. This LED also serves as the battery life indicator. It will alternate between green and red to indicate low battery life, blinking red more often as the batteries deplete. This feature will provide you with ample warning time to complete your current job before needing to change power sources.

POWER & MULTI-POSITION SENSITIVITY SWITCH
This switch controls the unit’s power supply and sensitivity. Once the unit is on, the operator can choose from 9 different levels of sensitivity depending on each job’s conditions.

TARGET INDICATORS
Easy to read left and right target indicators identify when an undetectable object has been located, and is parallel with the AML.

EASY BATTERY ACCESS
Patented Radio-Frequency Technology
Proudly Made in the USA
by SubSurface Instruments, Inc.
FCC, IC, UE/CE Approved

LED POWER INDICATOR
The LED power indicator has 2 functions:
1) A green light indicates the unit is ready for use.
2) A blinking green and red light indicates a low battery and requires a change in power source.

POWER & MULTI-POSITION SENSITIVITY SWITCH
This switch controls the unit’s power supply and sensitivity. Once the unit is on, the operator can choose from 9 different levels of sensitivity depending on each job’s conditions.

TARGET INDICATORS
Easy to read left and right target indicators identify when an undetectable object has been located, and is parallel with the AML.

ERGONOMIC HANDLE
The AML+ handle is designed to provide the user with a comfortable grip, ensuring an accurate reading when the fingers are placed along the knurls.

HEAEDPHONE JACK
A headphone jack allows the ability to connect the supplied high quality headphones (included).

BUILT-IN USB MINI PORT
A protected USB mini port provides the ability to connect the supplied external Lithium Battery source.

LIGHTWEIGHT, DURABLE CONSTRUCTION
The AML is constructed from lightweight, shock-resistant materials that make it easy to use and handle throughout the work day.

ULTRA-HIGH FREQUENCY (UHF) RADIO WAVE RECEIVERS
Highly sensitive dual left and right receivers intercept frequency refractions set off by the edges of buried PVC pipes. When the unit is positioned parallel to an undetectable object, both left and right target indicators are activated, allowing the user to identify the pipe’s location and run direction.

SubSurface Instruments is known for producing highly dependable and trouble-free locating equipment. However, should a warranty issue occur, our goal is to make your warranty experience as hassle-free as possible and get you back on the job site as quickly as possible.

SubSurface Instruments provides a Limited Warranty for 36 months or 3 years from original user’s purchase date. The AML Pro and AML+ are specifically guaranteed to be free of defects in both material and workmanship to the original purchaser.

Includes

- (1) AML Unit
- (3) 9 Volt Batteries Included per Pack
- 9 volt Battery Packs:
  - AML Pro: (2) Battery Packs (Each Housing (3) 9-Volt Batteries)
  - AML+: (1) Battery Pack (Housing (3) 9-Volt Batteries)
- (1) Auxiliary Rechargeable Lithium Battery Kit
- (1) Pair of Headphones (AML PRO includes Noise Isolating Headphones)
- (1) User’s Guide
- (1) Training Video
