

LISTENING STICK 1m & 1.5m

Featured Parts

- 1 Resonant Chamber
- 2 1 meter Listening Stick
- 3 1.5 meter Listening Stick

FEATURES

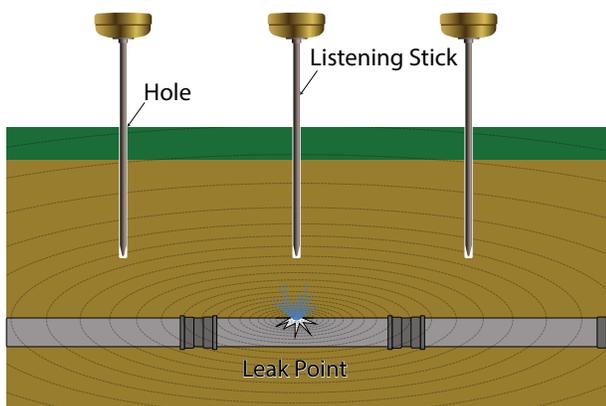

SIMPLE AND INNOVATIVE

The Listening Stick is an extremely sensitive, rod-based acoustic listening instrument designed for detecting water leaks at hydrants, meters, and valves. It is incredibly easy to transport, use, and maintain. With its lightweight and compact design, it requires no batteries, cables, or additional attachments, making it highly portable and convenient for on-the-go leak detection.

Its exceptional amplification capabilities ensure highly accurate leak detection and identification. Its simplicity ensures reliable performance, and it comes ready to use straight out of the box with no calibration needed. This makes it an affordable and efficient solution for professionals who need a dependable tool for accurate water leak detection.

BENEFITS:

- Low frequency for PVC & PE leaks
- Long life
- Low cost
